BIRD-NET - "A GROWING SUCCESS"

'Polygro' is proud to release pictures of the first structures using our quality BirdStop bird nets. Polygro has been supplying nets to our NSW growers for 9 months for both drape & permanent applications. Many growers are pleased with the quality and service Polygro has been able to supply.

Many growers in NSW have been supplied with Polygro's special reinforced hexagonal net. Polygro had this net manufactured for customers that needed a heavier weight bird net for permanent structures. Professional installers have used this net and have been extremely impressed with the quality.

Neville Dhillon says "I used drape net 18mths ago for my structures but since using Polygro's permanent nets, I wouldn't use anything else. Polygro's 13m wide reinforced hex net & 5m

permanent nets proved to be great quality and easy to install.

Setnarme Singh also commented "If you're going to net it is worth doing it properly first time around using quality materials, such as those purchased from Polygro. It costs too much to re-do it if you buy cheap

Setnarme Singh's professionally installed struc-

Neville Dhillon's permanent structures erected himself with the help of friends and co-workers.

COMPETITION WINNERS \$150 worth of Products

- **Primex** - Simon Lee - Hogarth Range, NSW
